Fulcrum Concepts Bore Brush

NSN 1055-00-227-0637

Features

Only sectional rocket pod bore brush handle currently available.

Design enables quick assembly for use and rapid disassembly for ease of storage or transportation. Rugged thick wall tubing resists bending commonly associated with one piece bore brush handles.

T-handle and increased length over previous bore brush handles allow for ease of use without the risk of injury from contact of the user's hands with the front of the rocket pod.

This product does not include brush and associated components. Three-piece handle only.

Handle fits these NSN components:

- Bore Brush NSN: 1055-00-871-8468
- Core NSN: 1055-00-871-8466
- Core-nut NSN: 1055-00-871-8467
