

YOU NEED TO LOSE WEIGHT NOT CAPABILITIES

Advanced weapons management designed from the ground up, with a cutting edge object-based graphical user interface developed by former special operations aviators based on decades of real-world experience and critical operator feedback. Fully integrated with WESCAM GEN II EO/IR systems.

- Adaptable**
- Compact**
- Lightweight**

20 lbs
Total System Weight

ARES is software based configurable system with a hardware based ARM-SAFE infrastructure. ARES is design to readily support both legacy and emerging weapons systems in a tactically optimized manner.

Compatible with multiple weapons systems, including:

- | | |
|--------------|------------------------|
| M134 | HELLFIRE II & HF-R |
| GAU-19 A/B | DAP-6 GUN POD |
| GRIFFIN® A/B | GAU-19 GUN POD (GP-19) |
| ROCKETS | LASER-GUIDED ROCKETS |

11 lbs
Total System Weight

DRAGON

Drakon is a lightweight, low-cost system designed to support customer requirements for control of guns and 2.75" rockets, including laser-guided rockets. As customer requirements grow, Drakon can be upgraded to an Ares system in a very efficient manner, providing best value for our customers.
