

FULCRUM BATTLESTATION

The Battlestation is a self-contained roll-on/roll-off (RO/RO) operator workstation configured for Armed ISR operations.

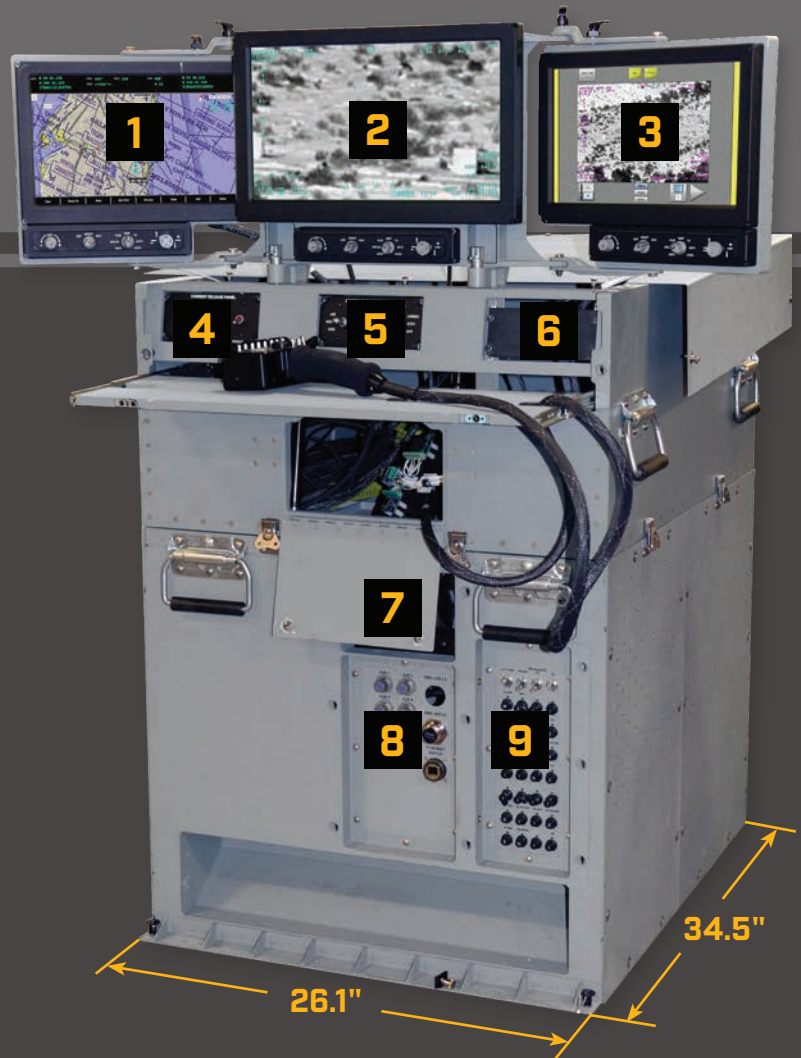

The system provides a user interface, LRU mounting, power distribution, and certified structure (9G's). It consists of two primary modules with closeout covers that easily detach for safe transport and storage.

System requires only:

- ▶ Power 28 VDC
- ▶ GPS Antenna Connection
- ▶ Connection to EO/IR & Weapons

FIND • FIX • FINISH

- ▶ ARES weapons management
- ▶ Pathfinder mission management
- ▶ Includes positions for:
 - Radios
 - Wescam Electronics Unit

- 1** Pathfinder Touchscreen Monitor
- 2** MX Video Monitor
- 3** ARES Touchscreen Monitor
- 4** Stores Management Panel (SMP)
- 5** Consent Release Panel
- 6** Laser Arm Panel
- 7** Data Storage Device
- 8** User I/O Panel
- 9** Circuit Breaker Panel
