

ROCKET TOOL KIT

This Rocket Tool Kit is designed to be a compact, convenient, and durable way to store and transport your essential rocket-related components. It comes with a collapsible bore brush and an ergonomic Mmunition Assist Tool, plus room for additional tools. The heavy-duty nylon bag protects your assets while making them easier to stow.

KIT CONTAINS:

Rocket Tools Component Bag

Munition Assist Tool

Bore Brush Assembly:

↳ *Bore Brush, Core, and Core-Nut*

SOLD SEPARATELY:

- ▶ Pferd Wire Brushes (QTY 2)
- ▶ Alkan 2037 Multi Tool Assembly
- ▶ Alkan 1216 Multi Tool Assembly

COMPACT. CONVENIENT. DURABLE.

» Tri-Fold Bag Made of 1000D Cordura Nylon

» Handle and Shoulder Strap for Easy Carrying

» Tools are Organized and Secured in Pouches

» Compartment for the Munition Assist Tool

» Compartments for the Bore Brush Assembly

» Plus Three Additional Miscellaneous Pockets

Secure it in an aircraft or on the FARP

BORE BRUSH ASSEMBLY

- ▶ Sectional three-piece design allows for quick assembly and easy storage when not in use or while transporting
- ▶ The thick-walled tubing of FC's new design resists the bending commonly associated with older, thin-walled design
- ▶ Increased length (6') and T-handle design allows for ease of use without injury from user's hands making contact with the rocket pod

MUNITION ASSIST TOOL

FEATURES IMPROVED ERGONOMIC DESIGN

- ▶ Rubber coated ends and non conductive material exceed all MIL-STD non-conductive and anti static requirements, reducing potential damage to the rockets and launchers
- ▶ Tapered body reduces chance of tool "hanging up" on sharp edges of rocket pod
- ▶ Increased width of igniter arm slot allows for easier use, especially in low visibility conditions

**MIL-STD-1686
COMPLIANT**
