

TECHNICAL WRITER

Job Responsibilities

- Fully participates in and support the Fulcrum Concepts Quality Management System
- Develops, writes, and edits material for reports, manuals, briefs, instruction books, catalogs, and related technical and administrative publications concerned with work methods and procedures, installation, operation, and maintenance of defense and aerospace products
- Technical writing duties include researching, documenting, and developing detailed procedures to include operating, maintenance, troubleshooting, fault isolation, checklists, technical specifications, field service bulletins, training materials, and other procedures and reports to FAA and/or USG/Prime customers
- Determines the needs of end users of technical documentation
- Gathers usability feedback from customers, designers, and manufacturers
- Interfaces with subject matter experts as needed in the writing, editing, and publication of various types of documents such as technical manuals, orders, specifications, modification work orders, test plans, procedures, and results, reports, plans, training material and presentations
- Able to augment text with selection of illustrations, photographs, drawings, diagrams, animation, and charts that increase users' understanding
- Researches a variety of assigned topics and develops writing plans and outlines
- Assists in the development of supporting materials (illustrations, tables, etc.) by sending illustration requests in a timely manner and with clearly detailed specifications
- Reviews technical documents for content, accuracy, and format
- Utilizes appropriate computer software and/or xml coding for technical documentation for IETMs
- Establishes and maintains electronic and/or hardcopy data library of documents and work order files for documents received for processing
- Tracks and monitors flow of all documents from inception to distribution of final copies for each assigned technical publication project
- Organizes and writes supporting documents for products
- Ability to comprehend source material in the form of engineering drawings, software description documents, test plans, design specifications/documentation, as well as discussions with engineers, pilots, mechanics, armament technicians, and military/civilian customers.
- Knowledge of S1000D Standards and ability to implement standards. Knowledge of military standards, such as MIL STD T40051, 3031 and 63029, preferred.

Physical Requirements

- Ability to lift light load as necessary
- Ability to operate in a clerical, office setting, routinely using standard office equipment such as computers, phones, photocopiers, filing cabinets, etc.

Give me a lever long enough, and a fulcrum on which to place it, and I shall move the world - Archimedes
