

BORE BRUSH ASSEMBLY

Getting into tight spaces is made easier with the Fulcrum Bore Brush Assembly, which allows armament personnel to efficiently clean and maintain rocket tubes. As an additional bonus, the assembly is composed of three pieces which break down easily into a small package for storing.

NSN 1005-00-227-0637

COMPATIBLE WITH:

1	Bore Brush, NSN: 1055-00-871-8468
2	Core, NSN: 1055-00-871-8466
3	Core-nut, NSN: 1055-00-871-8467

Note:

Brush and associated components not included – optional or customer provided. Works with the same NSN items as the existing one-piece bore brush handle.

HANDY DANDY CLEANING SOLUTION

- ▶ Sectional three-piece design allows for quick assembly and easy storage when not in use or during transport
- ▶ The rugged, thick-wall tubing of Fulcrum's design resists bending commonly associated with the solid, thin-wall, one piece bore brush handle
- ▶ Increased length (6') and T-handle design allows for ease of use without injury from user's hands making contact with the rocket pod
