

SINK YOUR CLAWS INTO THIS

Flying a mission that matters? Your bird needs CLAWs.

Rapidly re-configure your Black Hawk with Fulcrum's Configurable Lightweight Armament Wing (CLAW). A 2-to-6 station weapons wing, this classic airframe design is easily repairable and is hundreds of pounds lighter than other systems. Supports a variety of munitions, including the M230, GAU-19, Hellfire, M261, GP-19, and DAP-6.

DESIGNED TO PERFORM

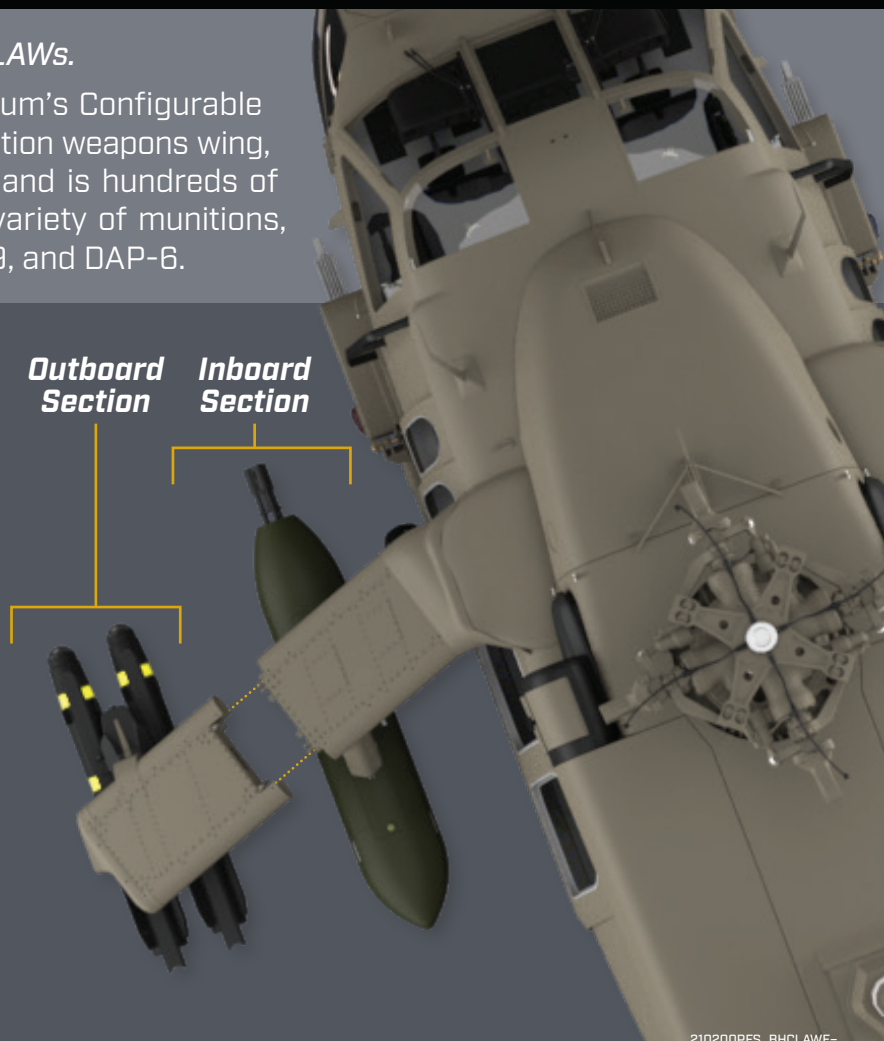

At nearly 400 lbs lighter than competing systems, the CLAW keeps you in the fight longer. Features lightweight aluminum construction. Easy to inspect, maintain, and sustain.

MAXIMIZE YOUR FLEXIBILITY

Mount up to four antennae (canted or level), and easily convert from four-station to two-station configuration to adapt to nearly any mission profile.

WEAPONS, SIMPLIFIED

Removes in minutes with no impact to troop or cargo compartments. Attaches to the airframe using standard ESSS attachments.
