

# FULCRUM DC DUAL EFFECTS LAUNCHER

Fulcrum's DC Dual Effects Launcher (DDEL) expands the capabilities of lightweight manned and UAS platforms.

## DC CONNECTIVITY

Compatibility with the Marvin Test Systems HSRL means users can deploy Hellfire munitions on legacy platforms without the need for AC power or additional electronics.

## MODULAR DESIGN

When the mission demands a change of payloads, the DDEL's modular design allows for rapid and efficient reconfiguration. Broaden your range of options with the Fulcrum DDEL.

## MORE POWER FOR YOUR PLATFORM

- » Common store interfaces with FARA MEL stores
- » Standard 14" ERU interface
- » Lightweight aerospace aluminum structure
- » Two-station, mission configurable, lightweight munitions launcher
- » Adds modular Hellfire capability to a broader range of platforms

*How can we support your mission?*
